PUTNAM

Many Local Advantages for Trade School Set Forth by Business Men—Secretary Hine States Purpose of the School—Prospects for Locating Here Good—Enthusiasm Shown—Putnam at Danielson Today—Other Matters.

That Putnam wants one of the trade schools to be established by the state, that every other town in this section of Windham county wants Putnam to have it, and that there are many good, sound, logical reasons why Putnam should get it, was made known in an uncertain way to Secretary Charles D. Hine and W. S. Palmer of New Haven, representing the state board of education, when they came to Putnam Friday afternoon to hear the arguments in favor of locating one of the schools in this city.

The meeting at which Messrs. Hine and Palmer were with a fund of information regarding Putnam's claims to recognition in the trade school matter, was held in Odd Fellows hall. There were more than half a hundred citizens in attendance, representative of financial and industrial interests in this town, and also representative of that class of men who are striving for the best interests of the city. To the last man they were enthusiastic over the possibility of securing an industrial school for Putnam and their enthusiasm was backed by facts that should give Putnam a decided edge in the matter of selection of a location in the eastern end of the state when the state board have completed their investigation in Putnam.

E. M. Wheaton presided over
